

Glastir Monitoring & Evaluation Programme

Final Report

Annexes

Number	Title	Status
1	Field Design	To be published shortly
2	Wales Farm Practices Survey – Design and Delivery	Published
3	Wales Farm Practices Survey – Statistical Analysis and Main Results	Published
4	Wales Farm Practices Survey – Legacy and Synthesis	Published
5	Wales Farm Practices Survey – Glastir Impact Modelling	Published
6	A Qualitative Evaluation of Glastir Woodland Creation and Management Schemes	Published
7	Glastir Uptake	To be published shortly
8	Carbon footprinting across the Welsh livestock sector and the efficacy of Glastir Efficiency Grant Schemes	Published
9	MultiMOVE modelling	To be published shortly
10	Land Utilisation and Capability Indicator (LUCI)	To be published shortly
11	Quantifying and defining High Nature Value Farmland in Wales	Published
12	Biodiversity	To be published shortly
13	Past Agri-Environment Scheme Impacts	To be published shortly
14	Analysis of biological recording data from Wales	To be published shortly
15	Mapping the extent and condition of Welsh peats	Published
16	Freshwater methods and Analysis	To be published shortly
17	Effect of the Glastir land management scheme on phytobenthos assemblages in Wales	Published
18	GHG from Welsh grasslands: Exploring new technologies	To be published shortly
19	Soil Methods	To be published shortly
20	Assessment of different management regimes on carbon accumulation in peat bogs	To be published shortly
21	Visual Quality Index	To be published shortly
22	New products from exploiting Earth Observation (above-ground Net Primary Production (ANPP) and woody cover product)	To be published shortly
