

Chapter 1 Introduction	1
1.1 Introduction	1
1.2 The GMEP approach	2
1.3 Current Status of Glastir Uptake	4
1.3.1 Spatial data acquired for analysis	4
1.3.2. Glastir uptake analysis methodology	6
1.3.3. Glastir uptake analysis results	7
1.4. Current Status of GMEP Data	23
1.4.1. Matching GMEP activities to Glastir uptake	23
1.4.2. Datasets acquired for the GMEP project	24
1.5 Current Status of GMEP Survey	27
1.5.1 Overview of methods	27
1.5.2 Biophysical survey	27
1.6 Future plans for Years 3 and 4	33
Chapter 2 Peat Soils	35
2.1 Introduction	35
2.2 Highlights and key findings	35
2.2.1 Key results from Year 2 include:	35
2.3 Methods	37
2.3.1 Peat extent and condition mapping	37
2.3.2 Peat core carbon accumulation rates	37
2.4 Results	38
2.4.1 Where does peat occur in Wales?	38
2.4.2. What are the current impacts of land-use on Welsh Peat Soils?	39
2.4.3. How much of the Welsh Peat Soils area has been affected by drainage?	40
2.4.4. How much CO2 can a blanket bog sequester?	41
2.4.5. What is the current contribution of Welsh Peat Soils to greenhouse gas emissions?	42
2.5 Future plans	44
Chapter 3 Socio-Economic Benefits	47
3.1 Introduction	47
3.2 Major achievements in Year 2	47
3.3 Key Findings in year 2	48
3.3.1 Wider Socio-Economic Effects of Glastir Efficiency Scheme Grants	48
3.3.2 Understanding Barriers to Uptake of Woodland Creation Schemes	48

3.3.3 The range of VQI across the Welsh landscape	48
3.3.4 Access	49
3.3.5 Condition of historic features	49
3.4 Wider Socio-Economic Effects of Glastir Efficiency Scheme Grants.....	49
3.4.1 Methods	49
3.4.2 Results	49
3.4.3 Summary	52
3.4.4 Potential Effects of Glastir Efficiency Scheme Grants on Farm Carbon Footprints	53
3.4.5 Recommendations	53
3.5 Understanding Barriers to Uptake of Woodland Creation Schemes.....	54
3.5.1 Methods	54
3.5.2 Results	54
3.5.3 Recommendations	55
3.6 Visual Landscape Quality	55
3.6.1 Landscape and Historic Environment as part of the Ecosystem Services Framework.....	56
3.6.2 Current Status and Trends	56
3.6.3 Aims of Glastir with respect to landscape & historic environment	57
3.6.4 Benefits of past schemes	58
3.6.5 Methods	59
3.6.6 Results	62
3.6.7 Viewshed Analysis Results	73
3.6.8 GMEP Photographic Preference Survey Results	74
3.6.9 What is the condition of historic features in the GMEP survey?	84
3.7 Future Plans	86
Chapter 4 Woodlands.....	89
4.1 Introduction	89
4.2 Achievements of the GMEP project in Year 2.....	90
4.3 Findings in Year 2	90
4.3.1 Extent	90
4.3.2 Condition	90
4.4 Policy context.....	91
4.5 Aims of Glastir for Woodlands.....	93
4.6 Benefits from options / past schemes.....	93
4.7 Methods.....	93

4.7.1 Woodland recording methods- General	93
4.8 Introduction to analyses	95
4.9 Is woodland cover increasing or decreasing?	95
4.9.1 Methods	95
4.9.2 Results	96
4.10 Is Woodland condition improving?.....	96
4.10.1 Methodology	97
4.10.2 Results	97
4.11 What is the Coverage of Woodland habitats in the GMEP sample?	100
4.12 What is the uptake of Glastir Woodland options and what extent of Woodland habitats are in the Glastir scheme?	100
4.13 Is there a difference in woodland condition of land coming into the Glastir scheme relative to that outside the scheme?	101
4.13.1 Methods	101
4.13.2 Results	101
4.14 What are the co-benefits of new woodlands? (e.g. Water quality, carbon, landscape?)	103
4.14.1 Methodology	103
4.14.2 Results	104
4.15 What are the co-benefits of better management of woodlands (e.g. for water quality, carbon, landscape?)	105
4.15.1 Methodology	105
4.15.2 Results	105
4.16 Development of a fine resolution Woody Cover Product (WCP).....	106
4.17 Habitat connectivity.....	107
4.18 What are the long term trends in Habitat connectivity of broadleaved woodlands?.....	107
4.18.1 Methodology	107
4.18.2 Results	108
4.19 Does habitat connectivity of broadleaf woodland vary according to whether land is in Glastir?	108
4.19.1 Methodology	109
4.19.2 Results	109
4.20 Does habitat connectivity of broadleaf woodland vary according to whether land is in Glastir using the Woody Cover product?.....	111
4.20.1 Methodology	111
4.20.2 Results	112

4.21 What are the long term trends in the length of Woody Linear Features?	112
4.21.1 Methodology	112
4.21.2 Results	113
4.22 Does the length of woody linear features vary according to whether land is in Glastir?	113
4.22.1 Methodology	113
4.22.2 Results	114
4.23 What are the long term trends in the condition of priority (section 42) habitats: Hedgerows?	115
4.23.1 Methodology	115
4.23.2 Results	115
4.24 How is the ecological condition of section 42 (priority) habitats Hedgerows related to Glastir?	117
4.24.1 Methods	117
4.24.2 Results	118
4.25 Future work.....	119
Chapter 5 Biodiversity.....	121
5.1 Introduction	121
5.1.1 Policy context	121
5.1.2 Major achievements in Year 2:	121
5.1.3 Key Findings in Year 2.....	122
5.1.4 Background to approach	123
5.1.5 Quantifying the impacts of Glastir on Section 42 species.....	123
5.1.6 Developing high precision ecological indicators back to 1990: Linking GMEP to Countryside Survey	123
5.1.7 New indices and data to describe long-term trends in Welsh habitats and biodiversity ..	124
5.1.8 Detecting the legacy effect of previous Agri-Environment Schemes (AES) within GMEP 1km survey squares	124
5.1.9 Priority (Section 42) Habitats.....	124
5.1.10 Remotely sensed data.....	125
5.1.11 What is covered in this chapter?	125
5.2 Biodiversity - current status and trends.....	125
5.2.1 Long-term trends in biodiversity in Wales	125
5.2.2 Priority Habitats	135
5.2.3 Distribution of Section 42 species and their coincidence with GMEP 1km survey squares.....	140

5.2.4 Occurrence of Section 42 species directly reported by the GMEP field surveyors.....	142
5.2.5 What are the long term trends in Habitat diversity?	146
5.3 Glastir impacts on Section 42 bird species.....	147
5.3.1 Evidence for previous AES impacts in Wales; a summary of the Tir Cynnal and Tir Gofal monitoring and evaluation programme	147
5.3.2 Legacy effects of agri-environment schemes on birds in Wales.....	149
5.3.3 Preliminary analysis of GMEP vegetation plots: can we detect a legacy effect of Tir Gofal on baseline habitat condition?	152
5.3.4 Application of indicators of Glastir impacts on Section 42 species; characterizing the GMEP baseline	156
5.3.5 Evidence for associations between breeding birds and Glastir management options.....	160
5.3.6 Does habitat diversity vary according to whether land is in Glastir?.....	169
5.3.7 What is the relationship between Habitat diversity and other diversity indicators?.....	170
5.3.8 Does habitat connectivity of wetlands vary according to whether land is in Glastir?.....	170
5.4 Remote sensing applications	173
5.5 Future work; priorities for years 3 and 4	173
5.6 Acknowledgements.....	173
Chapter 6 Climate Change and Diffuse Pollution Mitigation.....	175
6.1 Introduction	175
6.1.1 Overview of Greenhouse Gas Emissions from Agricultural Land Use in Wales and the contribution from different sectors.....	175
6.1.2 National Trends from the Land Use and Agriculture Sectors.....	177
6.2 Year 1 Achievements and Year 2 Aims and Highlights	178
6.2.1 Reminder of the Overall Achievements in Year 1	178
6.2.2 Year 2 Aims.....	179
6.3. Year 2 Highlights	179
6.3.1 Carbon Footprinting	179
6.3.2 Effects of Reduced Fertiliser N Use and Climate Change on Spatial GHG Emissions.....	179
6.3.3 Simultaneous Measurements of nitrous oxide, methane and carbon dioxide from Welsh grasslands	180
6.4 Methods.....	180
6.4.1 Carbon Footprinting	180
6.4.2 Estimating Effects of Reduced N Fertiliser Use and Climate Change on Spatial Emission of Greenhouse Gases.....	180
6.4.3 Simultaneous measurements of N ₂ O, CH ₄ and CO ₂ from Welsh grasslands	181

6.5 Results.....	181
6.5.1 Carbon Footprinting	181
6.5.2 Estimating Baseline Soil-Borne GHG Emissions and Effects of Reduced N Fertiliser Use and Climate Change on Spatial Emissions of Greenhouse Gases	183
6.6 Future Plans	184
6.6.1 Year 3	184
6.6.1.1 Carbon Footprinting	184
Chapter 7 Soil Quality	185
7.1 Introduction	185
7.2 Status and trends.....	185
7.3 Aims of Glastir.....	185
7.4 Benefits of past schemes	186
7.5 Key findings.....	186
7.6 Main Achievements	187
7.7 Methods.....	187
7.7.1 Carbon and organic matter content (Loss-on-ignition)	187
7.7.2 pH	188
7.7.3 Nitrogen	188
7.7.4 C:N.....	188
7.7.5 Phosphorus.....	188
7.7.6 Texture	188
7.7.7 Bulk density	189
7.7.8 Topsoil water repellency.....	189
7.7.9 Soil microbial diversity	189
7.7.10 Topsoil mesofauna	189
7.8 Results, status and trends.....	189
7.8.1 What are the long term trends for soil chemical and physical properties in Wales?	189
7.8.2 Is there any evidence of a difference in soil condition of land coming into the Glastir scheme?	194
7.8.3 Is there any evidence that the soil condition is higher in soils which were in past AES schemes, Tir Gofal, Tir Cynnal, compared to those that were not in schemes?	196
7.8.4 How do soils vary in condition by Broad Habitat?	198
7.8.5 What is the potential for land management to change soil condition	202
7.8.6. What is the current status of soil biodiversity in Wales and what influences its spatial and temporal pattern?.....	206

7.8.7 How can we quantify the Soil Natural Capital Assets in Wales?	215
7.9 Future Plans	219
Chapter 8 Freshwaters	221
8.1 Introduction	221
8.2 Headwater streams.....	221
8.2.1 Introduction	221
8.3 Freshwater highlights from Year 2.....	222
8.3.1 Streams.....	222
8.3.2 Ponds.....	223
8.4 Freshwater Methods.....	223
8.5 GMEP: what is the condition of headwater streams?	224
8.5.1 Stream habitat.....	224
8.5.2 Water chemistry.....	224
8.5.3 Macroinvertebrates	225
8.5.4 Macrophytes	226
8.5.5 Diatoms	226
8.5.6 Ecological quality.....	227
8.6 Long term trends	233
8.6.1 Quality of headwater stream conditions in and out of the Glastir scheme.....	234
8.6.2 Influence of past agri-environment schemes (Tir Gofal)	235
8.7 Ponds	235
8.7.1 Introduction	235
8.7.2 Condition of ponds.....	236
8.8 Plans for year 3	245
Chapter 9 High Nature Value Farmland.....	247
9.1 Introduction	247
9.2 Achievements in Years 1 and 2	248
9.3 Approach.....	249
9.3.1 Available habitat/land cover data	249
9.4 Approach.....	250
9.5 Type 1 HNV: Proportion of semi-natural habitat.....	250
9.6 Type 2 HNV: Farmland with a mosaic of habitats and/or land uses.....	251
9.6.1 Landscape heterogeneity	251
9.6.2 Woodland connectivity for HNV	252

9.6.3 Density of field boundaries	253
9.6.4 Species.....	253
9.6.5 Combining metrics	255
9.7 Type 3 HNV farmland: Farmland supporting rare species or a high proportion of European or world populations.....	257
9.7.1 Species.....	257
9.8 Case study areas	258
9.8.1 Preliminary HNV metrics	260
9.8.2 Combining metrics and comparing case study areas.....	265
9.9 Soil HNV	266
9.9.1 Why should we care about the soil resource in this way?.....	267
9.9.2 Overview of the soil resources of Wales.....	267
9.9.3 Soil Abundance.....	268
9.9.4 Relationships between soil, land cover and SSSI's.....	274
9.9.5 Summary of soils work	285
9.9.6 Summary and Future for HNV metric	286
Chapter 10 Trade-off and opportunity mapping	289
10.1 Introduction	289
10.2 Highlights from Year 2 and major findings	289
10.3 Methods.....	291
10.3.1 LUCI trade-off mapping approach.....	291
10.4 Results.....	294
10.4.1 Ecosystem services condition, opportunities to improve, and trade-offs or co-benefits between services	294
10.4.2 What determines ecosystem service distribution across the landscape?	300
10.5 Is land inside the Glastir scheme providing better flood mitigation protection to that outside the scheme?	302
10.6 Testing LUCI Model performance	302
10.6.1. LUCI model validation work	303
10.7 LUCI model progress and anticipated developments for GMEP year 3 reporting	306
Chapter 11 References	309
